

## Stop Press – 61

---

### India sorted – April 2018

What must be destined to be the definitive work on the subcontinent's issue has just been written by Nick Levinge and Rohit Prasad. It is an impressive A4 288 page hard-backed volume with chapters on the issue's History, Printing Process, Flaws, Usage, FDC's, Use Abroad, Postage Due, Jubilee Fund, Rocket Mail, Scarcity Guide etc. It is well illustrated throughout, including where newly discovered constant flaws are dealt with.

The cost is £45 + postage of £2.95 (to UK) or £15 (to elsewhere, by registered airmail from India). Enquiries to Nick Levinge at: [nicklevinge@gmail.com](mailto:nicklevinge@gmail.com)

### First Plate Log - March 2018

In his specimen collection, Geoff Locke has noticed Wv2A marks on 1d and 2½d values of his Virgin Islands set. (Perhaps we shouldn't be surprised that a specimen set should contain values from the same sheet position).

The 2½d observation has been added to our Pioneer Plates table.

### Barbados Sheet numbering - March 2018

With this example noted on eBay, the key letter "j" (ie: Noted with number adjacent to stamp 10/6) has been added to the Barbados listing in the Between the Sheets table.

French Morocco – February 2018

Gary Loew sent a scan of this interesting cover from Casablanca.

If it was double weight as airmail, it looks to have been priced for a European destination other than France or the U.K.

Lanyard flaw – January 2018

In case anyone was wondering if this De La Rue flaw has been found elsewhere, Patrick Delmore writes:

*Hello, Re: Lanyard flaw on the 3d Basutoland. I have the same flaw on a 2d Basutoland. Thanks for a NAME for this flaw. Pat.*

Latest use – January 2018

While Royal Mail would take a dim view of trying to use 1935 GB stamps today, the post office in Craigie, Western Australia would seem to approve their use by cancelling this example with a cds for 27 Dec 2017.

Is this a late use record?
